

Active harmonic filters - D20

- D20 is the ultimate solution for these problems in one, well-tailored package
AHF; SVG; ALB
- No additional CTs or PFC-controller required
- Auto Voltage & Frequency
Wide voltage range of 200~480 V for 3 W applications and 200~440 V for 4 W applications
Switch easily from 50 Hz to 60 Hz

Active harmonic filters - D10

- 3-level topology
- Modular scalability
- Voltage from 200 V to 690 V
- Rating of individual units:
25 A; 50 A; 100 A; 150 A; 200 A
- 3-wire or 4-wire
- Response time < 100 ms
